What is On-Screen Marking (OSM)?

On-Screen Marking (OSM) is a secure digital evaluation system that enables examiners to assess scanned answer scripts online through a centralized web-based platform. Our On-Screen Marking (OSM) Solution enables institutions to move from traditional paper-based evaluation to a centralized, transparent, highly secure and efficient digital evaluation ecosystem.

Instead of physically distributing answer booklets to evaluators, the scripts are scanned and uploaded into the system where authorized evaluators can access, review and award marks digitally.

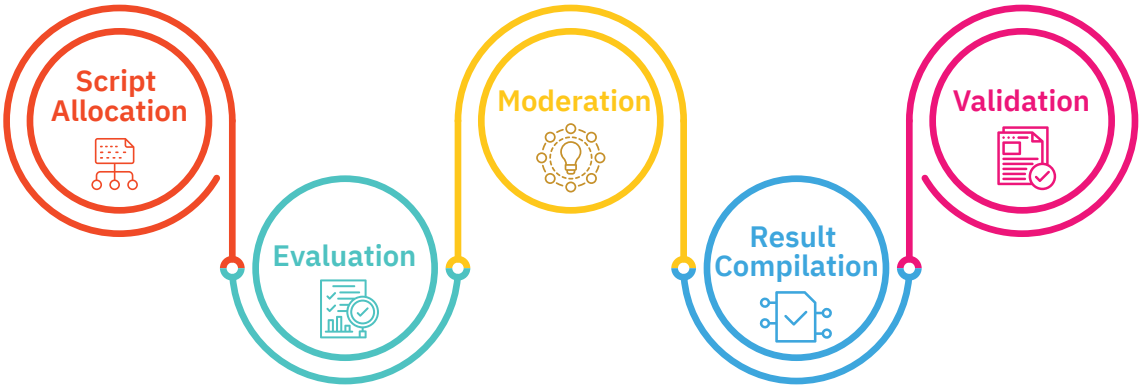

The platform supports:

- Multi-subject evaluation
- Multi-center operations
- Multi-level moderation workflows
- Real-time monitoring
- Secure access control
- Automated mark compilation
- Escalation & moderation management
- Complete audit trails
